SECRET FACT

The secret journey of a raindrop

Only for the Little Planets Crew

1. A drop of water spends about 9 days in the air on average before falling again as rain.

2. Every day the Sun lifts more than 1,000 km^3 of water from the sea.

3. About 97% of Earth's water is in the oceans.

"All the rivers run into the sea; yet the sea is not full; unto the place from whence the rivers come, thither they return again." — Ecclesiastes 1:7

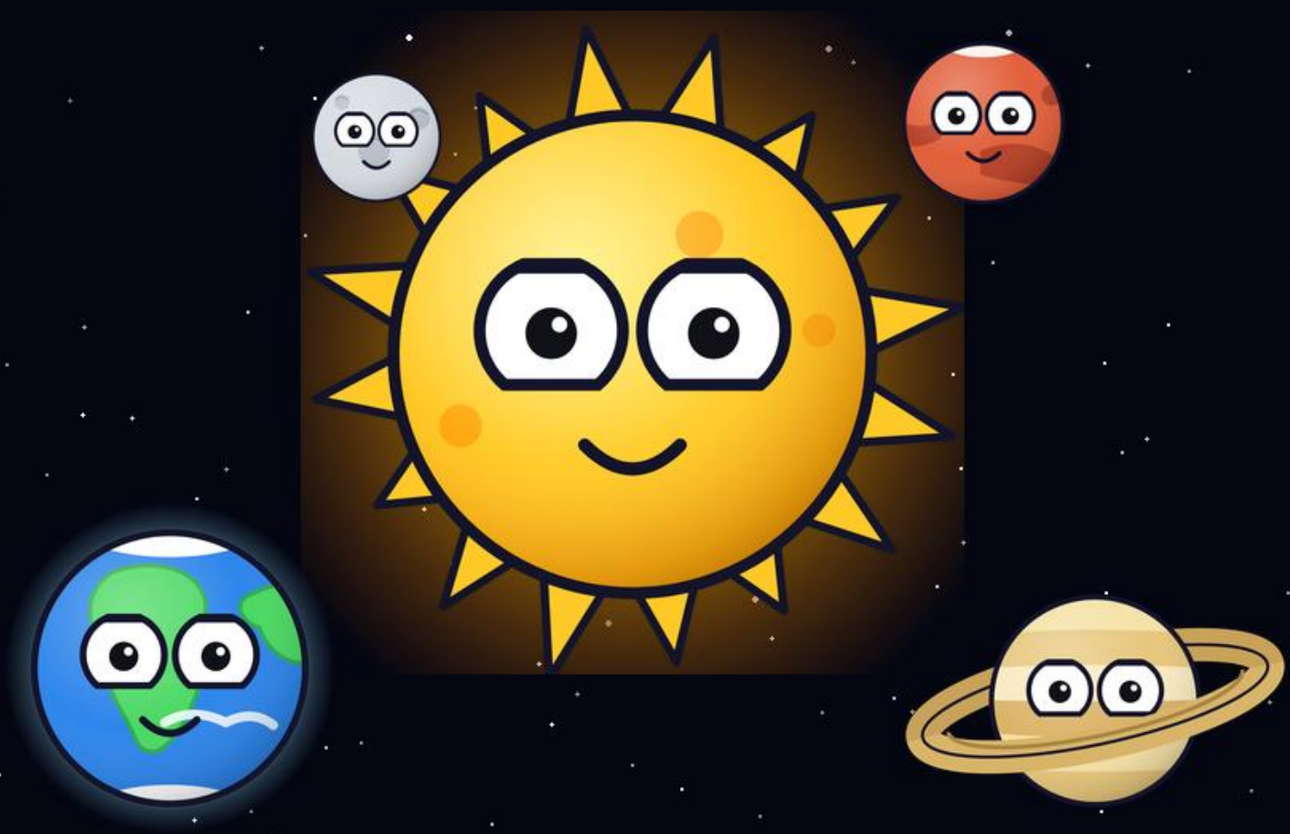

YOUR MISSION

Challenge: next time it rains, remember that drop was in the sea. Where do you live?
