SECRET FACT

3 secrets of Uranus

Only for the Little Planets Crew

1. Each pole of Uranus gets about 42 years of daylight in a row, then 42 years of night.

2. It is tilted about 98°: it spins almost lying down.

3. It was the first planet discovered with a telescope (William Herschel, 1781).

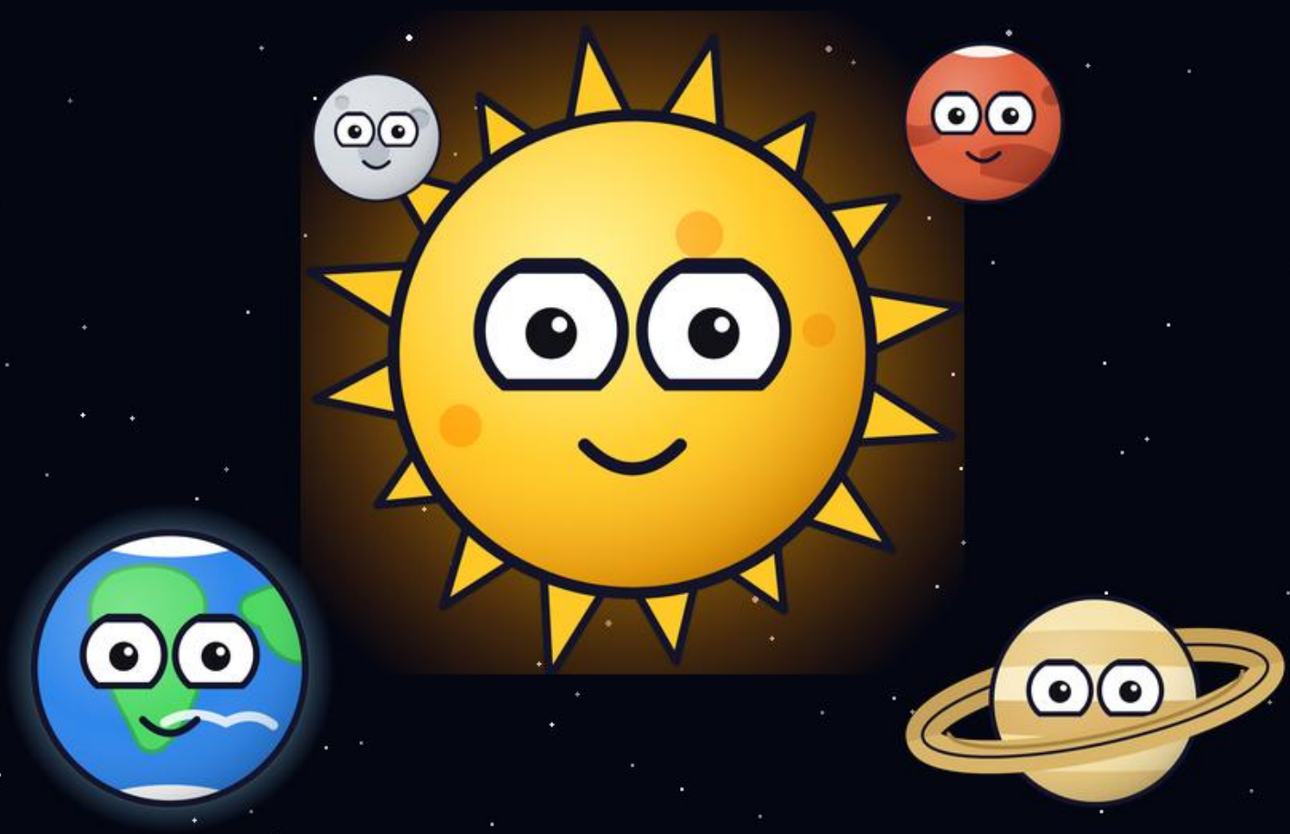

YOUR MISSION

Challenge: if you had 42 years of night, what would you do? Reply
