SECRET FACT

The weirdest days in the solar system

Only for the Little Planets Crew

1. On Venus a day (243 days) is longer than a year (225 days).

2. On Jupiter the Sun rises every 10 hours: two sunrises in one Earth day!

3. On Mercury, 176 Earth days pass from one sunrise to the next.

"This is the day which the LORD hath made; we will rejoice and be glad in it." — Psalm 118:24

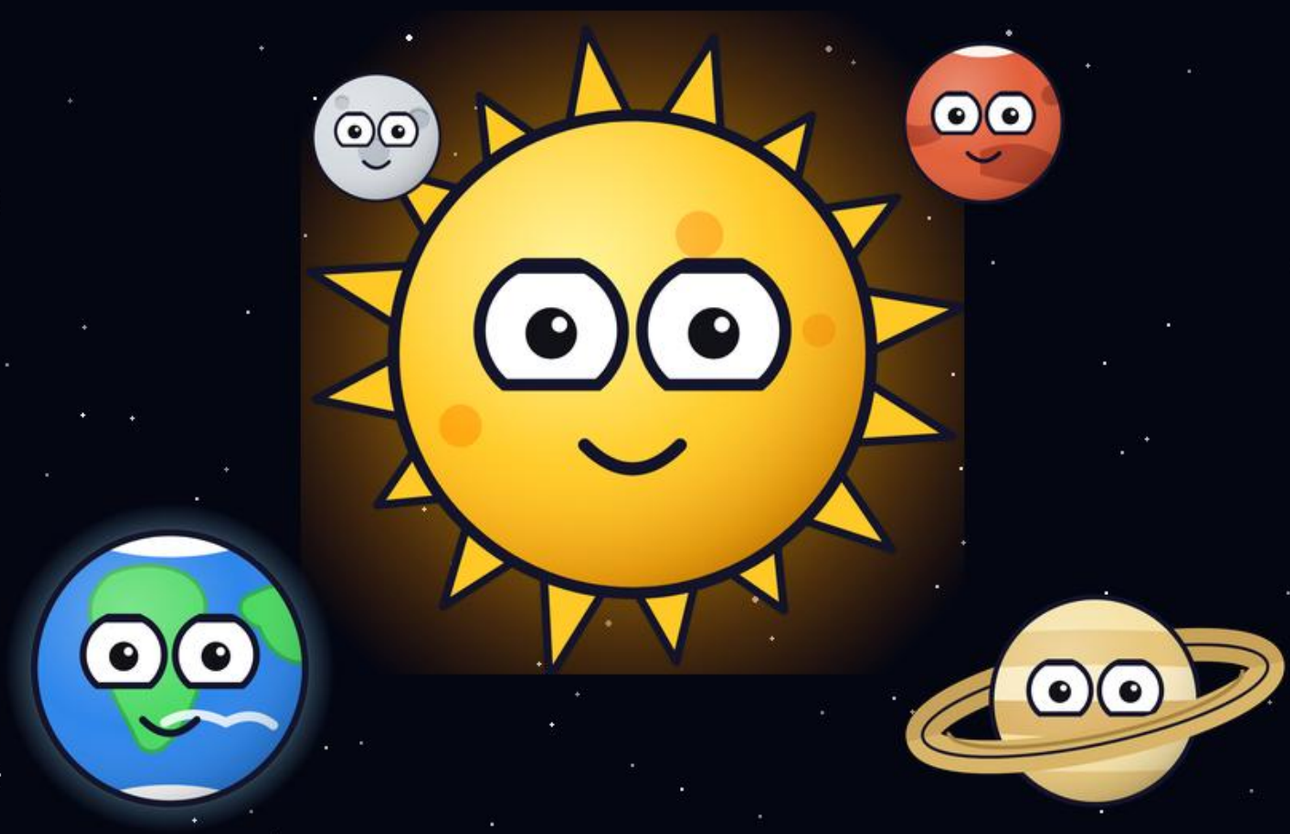

YOUR MISSION

Challenge: on which planet would you like to live based on day length? 🪐

Reply in this chat
