SECRET FACT

Your weight on each world

Only for the Little Planets Crew

1. On the Sun you would weigh about 28 times more than on Earth.

2. Your MASS is the same everywhere; what changes is how hard each world pulls you.

3. On the Moon you would weigh 6 times less: that is why astronauts bounced so much.

"He hangeth the earth upon nothing." — Job 26:7

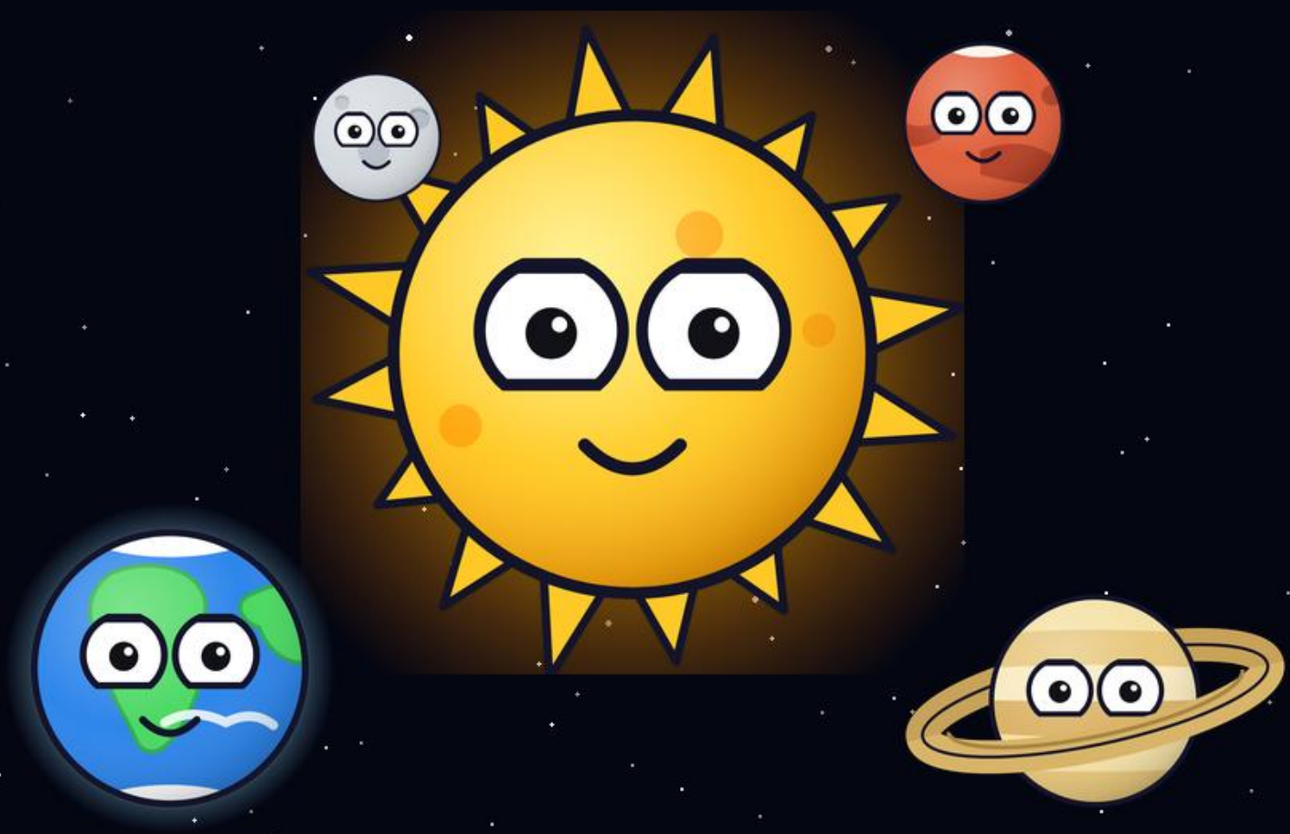

YOUR MISSION

Challenge: multiply your weight by 28 and tell me your weight on the Sun

Reply in this chat

WELCOME TO THE CREW!

You're now one of the Little Planets explorers
