

SECRET FACT

**Kepler: the scientist who saw
God in the sky**

Only for the Little Planets Crew

1. He discovered planets move in ellipses (1609), using Tycho Brahe's data on Mars.

2. His 3 laws are still used to send spacecraft and satellites.

3. He was a devout Christian: he saw the order of the universe as the work of a Creator.

**"The heavens declare the glory of
God; and the firmament sheweth his
handywork." — Psalm 19:1**

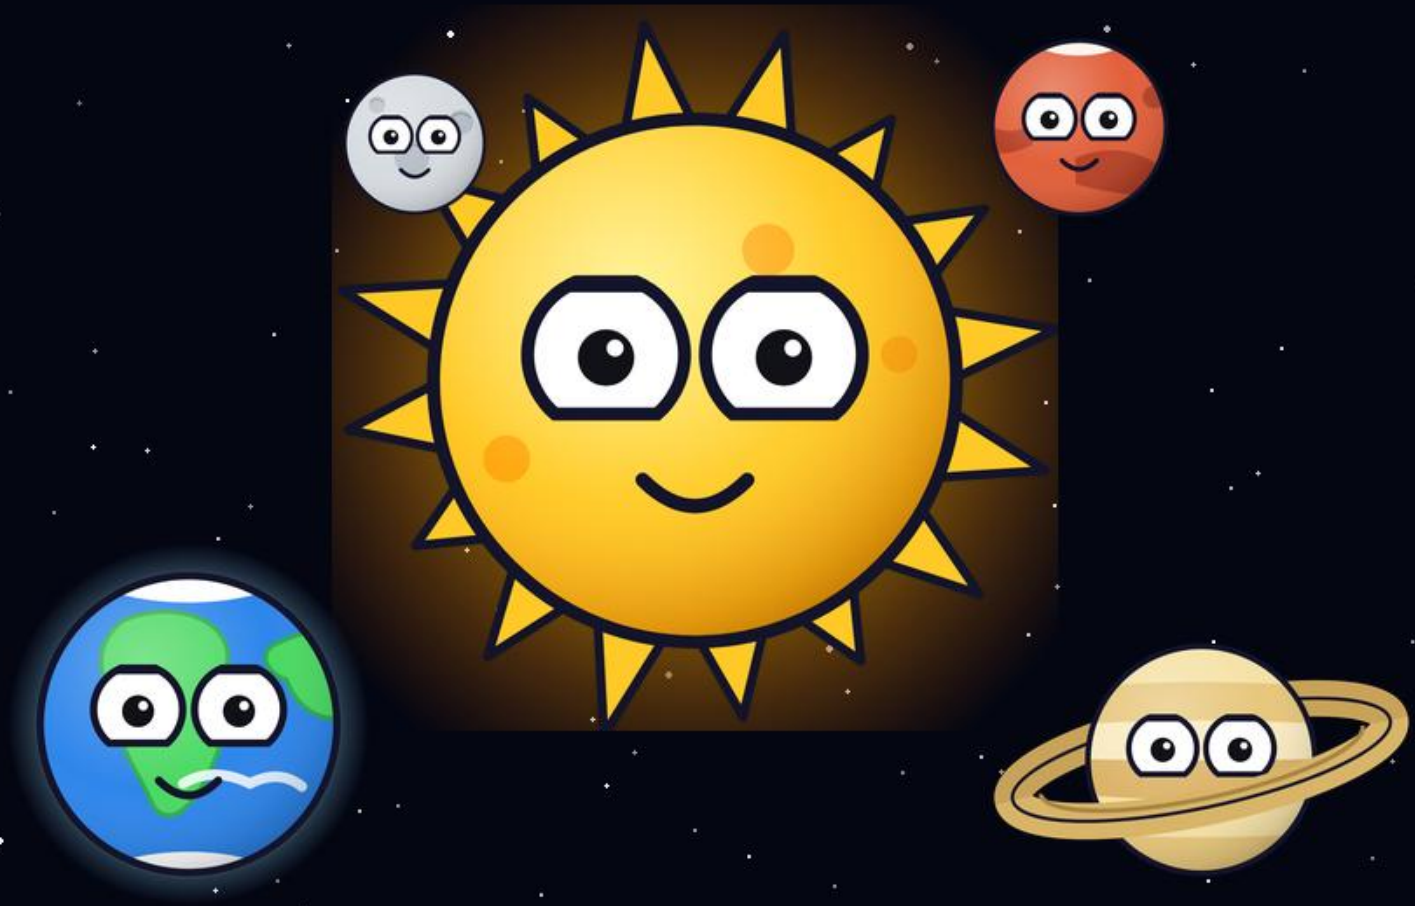

YOUR MISSION

Challenge: which other Christian scientist do you know? Send me the name and we'll feature them

Reply in this chat

WELCOME TO THE CREW!

**You're now one of the
Little Planets explorers**

**New missions every day on YouTube:
