

SECRET FACT

Saturn, unfiltered

Only for the Little Planets Crew

1. Its rings are over 270,000 km wide... but in many places thinner than a building.

2. It has more than 140 moons: one, Titan, has lakes of methane.

3. A day on Saturn lasts about 10 and a half hours.

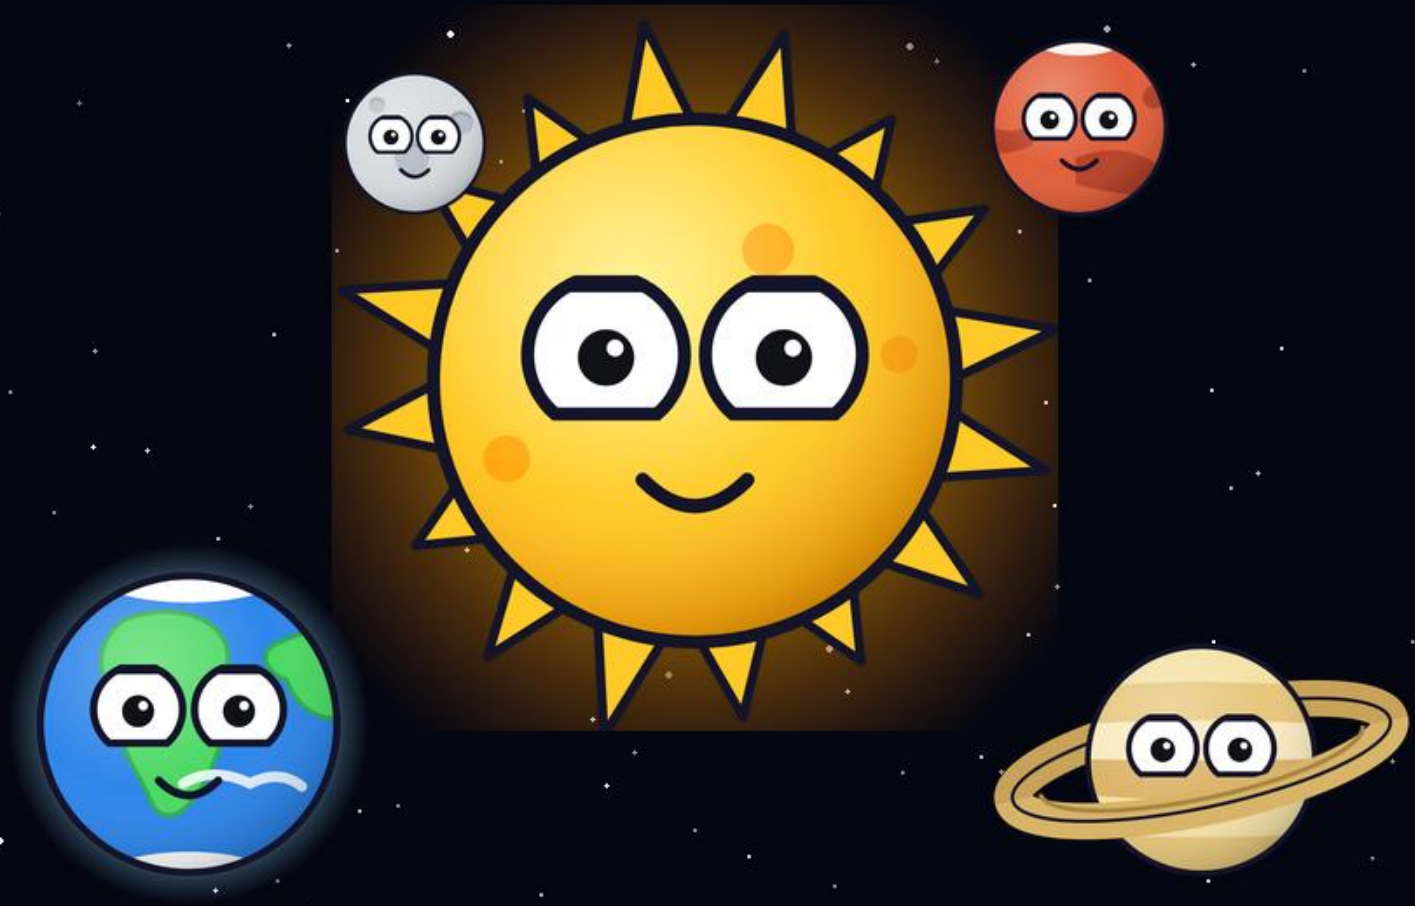

YOUR MISSION

Challenge: even a small telescope shows its rings. Have you ever seen them? Tell me
