# SECRET FACT

## Your jump on each world

Only for the Little Planets Crew

1. On Pluto you would jump almost 8 meters: like a 3-story building!

2. On the Moon astronauts hopped like kangaroos because of the low gravity.

3. On Jupiter you would weigh 2.5 times more and could barely jump.

"He stretcheth out the north over the empty place, and hangeth the earth upon nothing." — Job 26:7

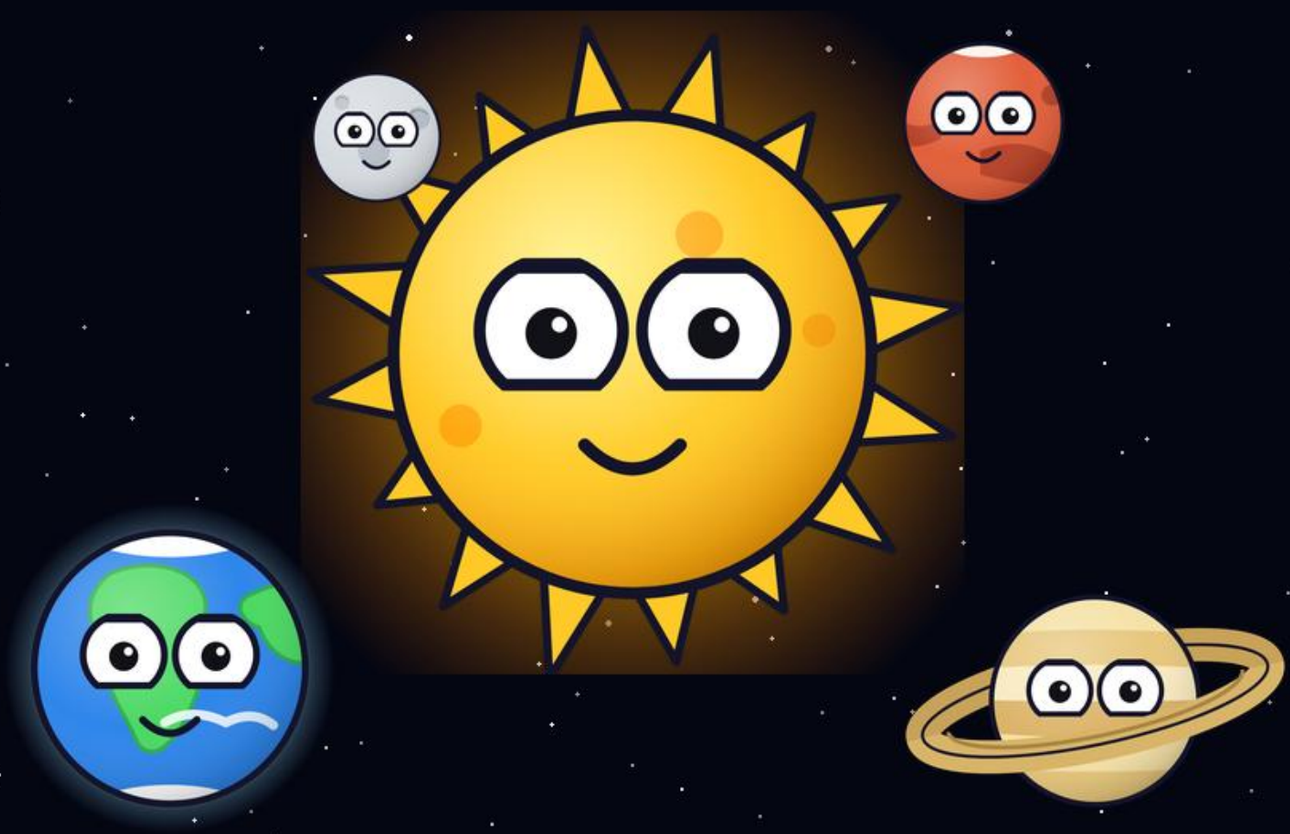

# YOUR MISSION

**Challenge: measure your jump and multiply by 16 for Pluto. Reply**

**Reply in this chat**

# WELCOME TO THE CREW!

**You're now one of the Little Planets explorers**
