

SECRET FACT

What does space sound like?

Only for the Little Planets Crew

1. Space has no air, so sound can't travel: it's total silence.

2. Astronauts talk by radio, which uses waves that do cross the vacuum.

3. NASA turns space waves into sounds we can hear ('sonification').

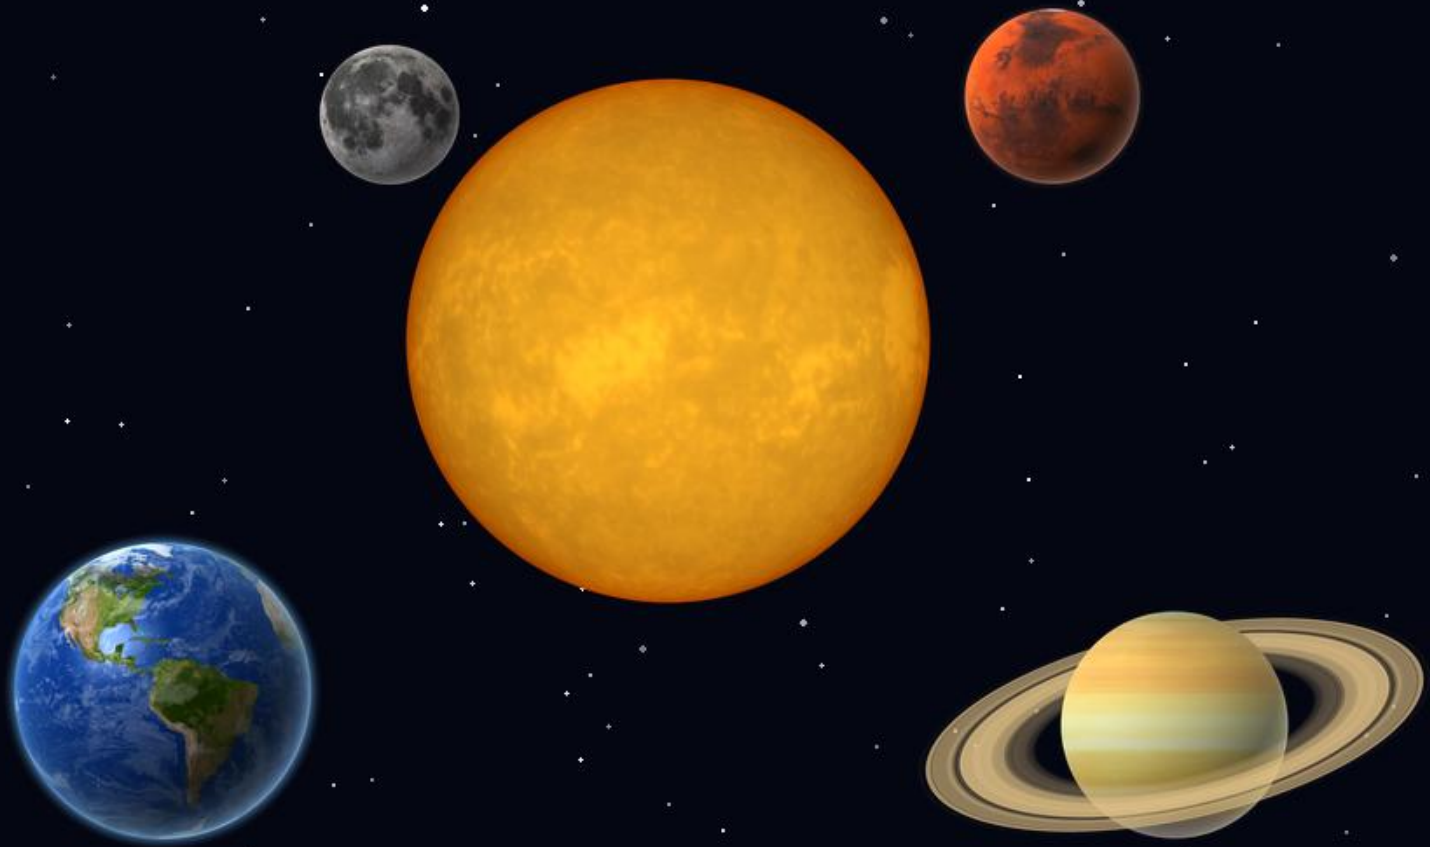

YOUR MISSION

Challenge: if you could hear one planet, which would it be? Reply and we'll make a video

Reply in this chat

WELCOME TO THE CREW!

**You're now one of the
Little Planets explorers**

**New missions every day on YouTube:
