

SECRET FACT

**If the Sun turned off: minute
by minute**

Only for the Little Planets Crew

1. Minute 0 to 8:20 — we'd notice nothing: the light is still on its way.

2. Minute 8:20 — total darkness; the Moon goes dark too (it shines with sunlight).

3. 1 week: about $-18\text{ }^{\circ}\text{C}$ · 1 year: about $-73\text{ }^{\circ}\text{C}$ (scientists' estimates).

**"And God made two great lights; the
greater light to rule the day." —
Genesis 1:16**

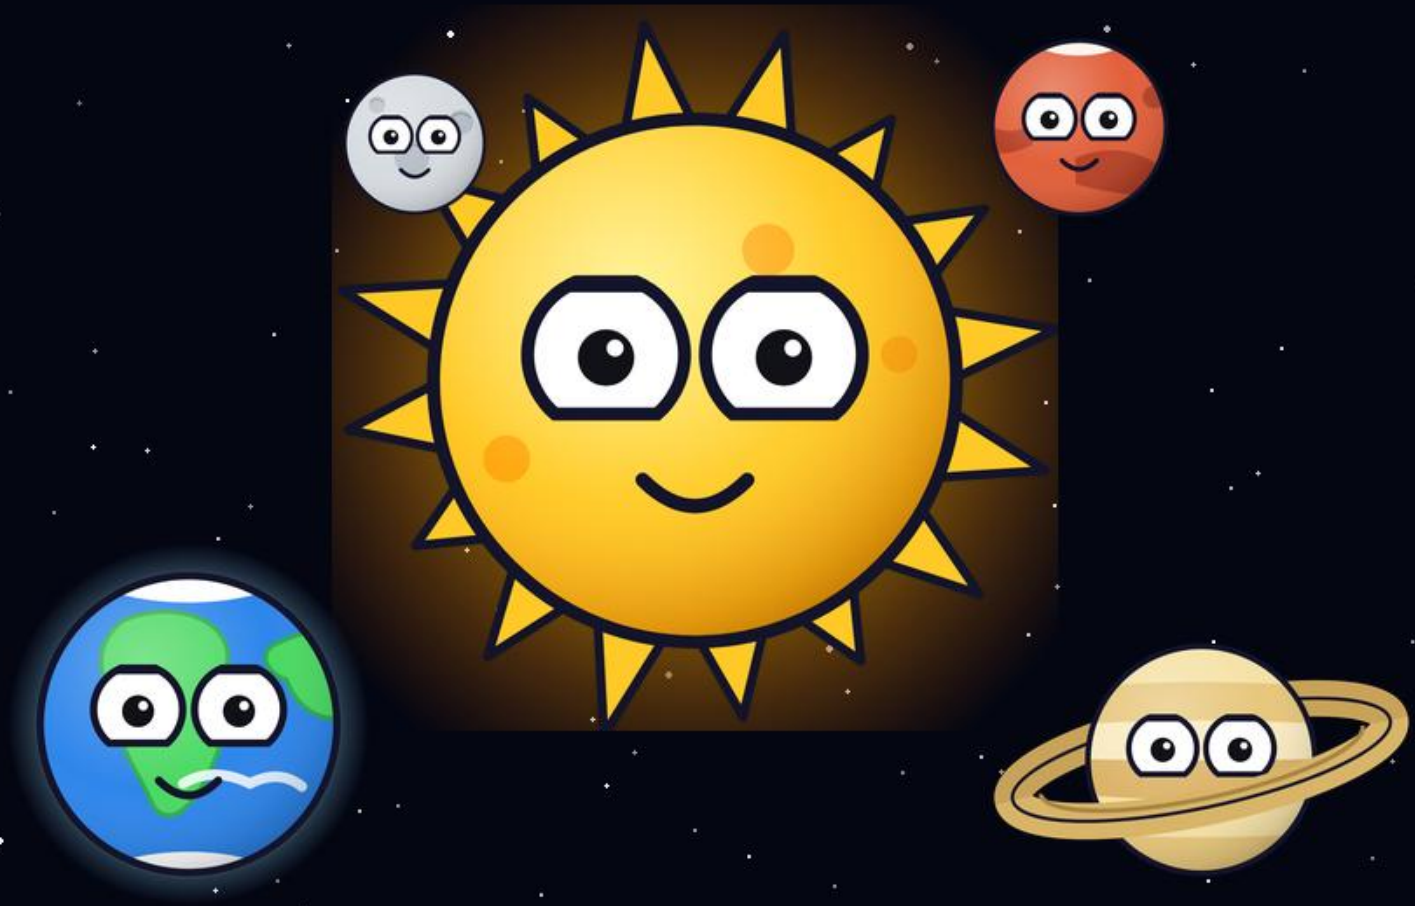

YOUR MISSION

Challenge: what would you do in those 8 minutes and 20 seconds?
